The Impact of Johns Hopkins in the Third Congressional District

Johns Hopkins Facilities & Operations in the District

12,612 JH employees working in the congressional district
9,979 Congressional district residents employed by JH
$815M In wages and salaries paid by JH to congressional district residents
$282M Paid to congressional district-based suppliers and contractors
1,407 Congressional district residents enrolled at JH
$16.3M Financial aid to students residing in the congressional district
474,484 Patient visits by congressional district residents to JH health care providers

Leaders in research and health care

Two of the Third District’s leading institutions are affiliated with Johns Hopkins. With revenues over $1.2 billion in fiscal year 2014, the Johns Hopkins Applied Physics Laboratory in Laurel, Maryland is the largest university-affiliated research center in the United States. APL’s work encompasses research on national security problems, the development and testing of new defense technologies, information security, the planning and management of major space missions for NASA, and the development of innovative medical devices.

Johns Hopkins Bayview Medical Center is a 447-bed hospital that provides both acute care and outpatient services, with particular strengths in geriatric medicine, alcohol and substance abuse and neonatal intensive care. It also houses Maryland’s only adult burn center.

Les Baugh, of Colorado, made history at the Johns Hopkins University Applied Physics Laboratory when he became the first bilateral shoulder-level amputee to wear and simultaneously control two of the Laboratory’s Modular Prosthetic Limbs. Muscle reinnervation allows him to control prosthetics with his thoughts.
