Howard County General Hospital

Howard County General Hospital is the fast-growing County's only acute-care hospital, with strengths in women's and children's health, emergency medicine, intensive care, surgery, psychiatry, stroke, cardiology and community health education. Howard County General is also the County's second-largest private employer (2018). In 2018, Howard County General became the first community hospital to host a branch of the Johns Hopkins Armstrong Institute for Quality and Patient Safety, one of the nation's leading centers of research and innovation aimed at improving the quality and safety of health care. Armstrong Institute at Howard County General will focus on translating the results of the Armstrong Institute's work into practical improvements that can be implemented by community hospitals.
